

Rahul Verma - Backend Developer

Summary: Backend developer with 3 years of experience building Python REST APIs and working with PostgreSQL.

Experience:

- Designed and built REST API endpoints in Python (Django REST Framework) for a mid-size internal web app.
- Wrote and optimized SQL queries on PostgreSQL.
- Documented endpoints and collaborated using Git and pull requests.

Skills: Python, Django REST Framework, SQL, PostgreSQL, REST API design, Git.

Gaps for this role:

- No hands-on Docker, Kubernetes, CI/CD, or AWS experience (services were deployed by a separate DevOps team).
- No experience with large-scale / high-traffic production systems.
